HSC, 2012

Percentage: 52%

ATMIYA INSTITUTE OF TECHNOLOGY & SCIENCE, RAJKOT
BE – COMPUTER ENGINEERING, 2012 – PRESENTLY STUDYING 8TH SEM.

CPI: 6.12, CGPA: 6.60

PERSONAL DETAILS |

NAME	Abhishek Chotaliya
FATHER'S NAME	Umeshbhai Chotaliya
DATE OF BIRTH	7th March, 1995
MOBILE NUMBER	+91 88667 49048
EMAIL	abhishekchotaliya.7@gmail.com
RESIDENCIAL ADDRESS	"Abhishek", 8–Archanapark, University Road, Rajkot (360005)
STATE	Gujarat
NATIONALITY	Indian
HOBBIES	Musical Keyboard, Online games

PROJECTS DETAILS:

Project Title	Travel Booking System
Project Technology	JAVA
Frameworks used	Struts, Servlet, Tiles, MVC
Server Used	Apache Tomcat
Tools Used	Eclipse, Brackets, XAMPP
Team	3 members
My Role	As a developer
Description	Online Travel Booking System developed to be used by bus travel agencies and by the end user customers. Travel agencies use this project for maintaining their bus trip schedules for daily buses or for some days of week between different cities they serve. The operators as well as the customers can reserve tickets through this system. The complete system is online, So once the seat is booked its effect is visible through the travel company website. The website shows the time-table of various trips and also the fares and arrival/departure times of various buses. Various filters and advance booking facilities are also included in the website. It also shows the details about bus types like a/c, non a/c, 2/3 sitting. Sleeper, semi-sleeper, etc. Trip status displays the seats in the graphical view of sitting arrangement whether any seat is available or not. It also suggests the customers about the next bus timings to the same city.

Project Title	ToneLiber – Music Streaming website
Project Technology	JAVA with AJAX
Frameworks used	Struts, Servlet, Tiles, MVC
Server Used	Apache Tomcat
Tools Used	Eclipse, Brackets, XAMPP
Team	3 members
My Role	As a developer
Description	ToneLiber is an online music streaming website, it uses AJAX to send and receive the data, thus is very fast and no refreshing is needed during the user session except for signing in. Different artists can upload their individual sound tracks or complete albums (with the options like genre, album art, tags, etc.) on the website and the website users can listen, like, comment, share and download the individual track or album. Users can also create their own playlist from thousands of tracks and share them. User can create their profile, they can add profile picture, contact details, achievements. Registered users can also chat with each other. The website is responsive, so it can run on all different resolution devices very easily and uniformly, and that makes the user interaction very easy. The complete website data is stored in the cloud hosting, so you can listen to your favorite music anytime, anywhere.
